## I N T R O D U C T I O N

The Alberta Bureau of Statistics is presently conducting the Alberta Salary and Wage Rate Survey - 1968. This preliminary report is based on the returns of the initial six hundred seventeen companies and organizations responding in the survey. Summary wage and salary data are published in one hundred seventy-one occupations for Alberta, Calgary and Edmonton. The summary data will be revised and updated as soon as the questionnaires outstanding are received. The final report will then include these data, a breakdown by type and size of firm, a listing of the firms participating in the survey, and a job description of each position. In addition to Calgary and Edmonton, regional pay data will be given for Lethbridge, Medicine Hat, Red Deer and Grande Prairie.

The ranges quoted in this report represent the middle eighty per cent of the reported rates in each position. Only rates within this range are considered in calculating the median and weighted average for each occupation. A detailed description of survey methodology introduces the final report.

The fifteen occupational categories in the survey are outlined on the right to serve as a guide in this report.
